

Version Comparison – Archicad 25 vs. Start Edition 2022

Feature on Archicad 25	Type	Included on SE2022
Navigation Improvements	Workflow	✓
Create Polygonal Openings in any 2D or 3D view	Modeling	✓
Stair Improvements - New tread symmetry combinations for all winder types - New Stair Landing control - New "Along Chord" stair construction geometry method	Modeling	✓
PARAM-O Improvements	Add-On	✗
Load Handling in Structural Analytical Model	Open BIM	✗
Automatic Export Mapping of Manufactured Profiles	Open BIM	✗
Custom Alignment of Replacement Profile (1D Members)	Open BIM	✗
New Offset Adjustments/2D Cutback Improvement	Open BIM	✗
Connection Range Improvements	Open BIM	✗
Support for All Released SAF Versions	Open BIM	✗
Create Structural Supports - Streamlined Input	Open BIM	✗
Native Survey Point	Workflow	✓
RFA and RVT Geometry Exchange	Open BIM	✗
Archicad - Solibri Connection	Open BIM	✗
Surface Textures on S/E/IE Viewpoints	Visualization	✓
Surface Based Fills	Visualization	✓
Modular Kitchen Cabinets	Modeling	✓
Life-Like Interiors	Modeling	✓
Track Changes and Model Compare improvements	Workflow	✗
Object Settings Elevation and 3D Previews free rotate	Workflow	✓
Updated Line popup	Workflow	✓
Updated Surface and Fill Settings - Realistic soft shadow and cover fill option on top of textures	Visualization	✓
Support for Rhino 6 and 7	Modeling	✗
Export Building Material Classifications as IFC Classification References	Collaboration	✓
Native Metal graphics technology replacing Open GL on macOS	Visualization	✓
Archicad Survey Point Supported in RVT Workflow	Collaboration	✗
Redshift by Maxon rendering engine – faster, GPU-based rendering	Visualization	✗
Zones to appear on Section/Elevation/Interior Elevations	Documentation	✓

Label Zones with auto-text and/or GDL based Labels, just like other elements	Documentation	✓
Schedules: control Merge Uniform Items per fields on a more granular level	Documentation	✓
Additional Graphic Override Improvements	Workflow	✓
New transparency control for custom RGB Surfaces overrides	Workflow	✓
Option to hide contours in model views of Cut and Uncut parts of elements	Workflow	✓
Update properties in hotlink modules	Workflow	✗
New command to check for the overlap of linear elements - Partial overlap check on linear elements: line, polyline, arc, wall, beam, column	Workflow	✗
Graphic Override	Workflow	✓
